

BSc (Hons) in Information Technology Year 1

Tutorial 5

IT1010 – Introduction to Programming

Semester 1, 2023

Exercise 1: Practice to write while loops

Write C programs to

- i) Display numbers from 10 to 20.
- ii) Prompt the user to enter series of numbers from the keyboard and display the numbers. If user enters a negative number stop reading the numbers.
- iii) Modify the program written in ii) above display the sum and average of the positive numbers entered.

Exercise 2: Compare while and do while loop

What do the following two code segments will print for the cases x = 1 and x = 10?

Exercise 3: Practice to use loops (Use while loop)

- i) Write a C program to enter 4 module marks of a student from the keyboard and display the total of all four module marks.
- ii) Modify the program written in i) above to enter 4 module marks of 3 students and display their total marks.
- iii) Display the student with the highest total mark.
